

ITEC FRONTMATEC HYGIENE // HYGIENE FLOOR & HYGIENE CARPET

EXPERIENCE OUR WHEEL AND SOLE CLEANING!

Our Hygiene Floor is a groundbreaking solution for minimizing dirt and germ transmission in cleanrooms. Seamlessly integrated into the floor, it allows for the implementation of hygiene gates for transportation. Featuring customizable cassettes housing high-quality brush strips and embedded in a catch basin with drainage, this design provides both wet and dry cleaning for wheels, rollers and soles. Optionally, we offer dry variants as well as automatic cleaning agent dosing. The cassettes can be easily removed and flipped up thanks to a simple tool-free mechanism, simplifying the cleaning process.

In addition to the Hygiene Floor, we present the Hygiene Carpet, which is installed as a surface-mounted option on the floor. Both crafted with floor trays and grates made of high-quality stainless steel (material 1.4301)

Dimensions	Various sizes available
Maximum Load	Depending on the version, up to 0.5 t or up to 5 t
Water Drainage	DN 70
Detergent Dosing	Dimensions (W x D x H): 400 x 200 x 400
	Electrical Connection: 230V~50-60Hz
	Water Connection: 3/4" Cold Water Connection

Value for you!

- Sustainable reduction of contamination risks
- Increase in material flow efficiency through on-the-go cleaning
- Efficient cleaning of contact surfaces of forklifts, wheels and soles
- Space-saving design thanks to floor (integrated) mounting
- Energy-efficient solution due to functionality without motor usage
- Available in various sizes thanks to the modular cassette system
